

# Production Planning and Manufacturing in SAP S/4HANA

This comprehensive course has been designed production planning and manufacturing consultants who intend to pursue an SAP Associate Certification in SAP S/4HANA Production Planning and Manufacturing.

This course will cover the major production planning and manufacturing functions, and configuration requirements And the major production types (focusing on production orders) and capacity planning functions, as well as the corresponding configuration requirements you need to know for implementing the SAP Production Planning and Manufacturing module.

Through lectures and numerous exercises, you will receive extensive practice based on many business transactions, leading to increased confidence in applying what you have learned in subsequent projects.
